

Education4allSDGs Application

Role and composition of the International Expert Committee

From the project launch, an international expert committee specialized in education and education for sustainable development (ESD) was established by the International Steering Committee. These experts volunteered their time to participate in online meetings and to provide additional feedback and input via email.

Two pilot experts (Aaron Redman and Monique Dupuis) were recruited to lead the expert contributions and provide cross-system expertise on the 2030 Agenda and ESD at the global level. They led and facilitated the work of the international expert committee in coordination with experts from SDG Champions France and the French Water Partnership.

These pilot experts have worked continuously since the project launch in May 2024, while the international expert committee met three times and provided requested feedback virtually.

List of experts recruited to contribute to the project

Proposer	Name	Organizations	Geographic area	Female / Male	English / French speaking
